

Initial Diligence Questions

Revolving credit – launch and economics

- Launch date for revolving credit ?
- Target APR, minimum payment formula, and eligibility criteria at launch. Does the full book qualify on day one, or selected cohorts/score bands only?
- Expected share of balances revolving at month 6 and month 12 post-launch?
- Provisioning approach for revolving balances, and how the credit policy treats a revolver that subsequently goes delinquent (limit freeze, re-age rules, minimum-payment escalation).

Asset economics – pre- and post-revolving

- Installments are 18.2% of the June 30 book at a -7.2% blended fee on volume, with -11% of originated volume cancelled. Term distribution behind the blended fee, and fee treatment on cancellation (refunded or retained)?
- The June 30 tape shows every account with a live installment balance as Current – we assume plans are cancelled or accelerated into the statement balance on delinquency. Confirm the mechanics, and provide delinquency and loss performance on a plan-level basis.
- Unit economics per active account today (interchange, installment fees, late fees, less credit cost and processing cost), and the same view pro forma with revolving at your base-case adoption.

Underwriting and credit risk

- 2024Q3–2025Q2 cohorts show 10–25% of accounts ever reaching 90+ DPD – high for a prime positioning. What drove this, what changed, and what is the target loss rate for 2026 vintages at the re-leveled limits?
- Credit limit re-leveling raised the median limit from PHP 35K to PHP 50K in March 2026. What guardrails cap exposure growth for accounts with limited payment history, and how will limits interact with revolving eligibility?

Charge-off, collections, and recoveries

- The June 30 tape carries PHP 11.1M of 180+ DPD with no write-off. What is the charge-off policy (we would expect write-off at 180 DPD), and when will a written policy be adopted?
- Recoveries achieved on 90+ DPD balances to date?

Data requested

- Per transaction/payment: full payment-level tape (charge date, payment date, amount) for all accounts since inception – transactions and payments, not statement summaries.
- Per installment plan: plan ID, origination date, term, fee, status, cancellation/acceleration date and reason.
- Per cohort: monthly origination, outstanding, and cumulative gross/net loss by MOB, split purchase vs. installment.
