February launches boosted March metrics

Android

Feb 8

- Applicants:
67% (Feb), 57% (Mar)
- Approved:
65% (Feb), 52% (Mar)
- 44k organic waitlist sign ups since launch

Installments

Feb 11

- 21% of eligible transactions were converted (Mar)
- 12% of active users used installments (Mar)

Credit Limits Re-leveled

March 16

- Mean vs. Median CLs:
 - ₱59,600 vs. ₱35,000 (before)
 - ₱67,700 vs. ₱50,000 (after)
- Activity Rates were 2,300 b.p. lower (52% vs. 75%) for users whose CL is less than ADB
- Normalized CL distribution; loosened harness (and drag) of self reported income on CL

User feedback validates product direction

70.2

NPS

Goal of >70 “World Class.”
Up 12 points from 59 in Q4.

Breakdown:

- 76.78% Promoters
- 16.65% Passives
- 6.57% Detractors

63%

Superhuman Question

Users who would be “very disappointed” if Zed went away tomorrow.
62% in Q4.

Breakdown:

- 63.3% Very Disappointed
- 29.6% Somewhat disappointed
- 7.1% Not disappointed

Product & User Feedback

What we shipped

Installments filled a real need

Users who would be Very Disappointed if Zed disappeared

* Effect of credit limit increases not reflected in survey – Survey ran prior to roll out (late march)

Areas for Improvement		Q4 Mentions	Q4 %	Q1 Mentions	Q1 %	Delta
1	Credit limit / limit increases*	91	20.0%	120	20.1%	+0.1 pp
2	Rewards / perks / promos / partnerships	81	17.8%	98	16.4%	-1.3 pp
3	BNPL / purchase installments	132	28.9%	50	8.4%	-20.6 pp
3	Acceptance / payment coverage (QR & other rails)	37	8.1%	50	8.4%	+0.3 pp
5	App UX / statements / controls / notifications	46	10.1%	44	7.4%	-2.7 pp
6	Fees / interest / charges / waivers	19	4.2%	23	3.9%	-0.3 pp
7	Customer support / service	7	1.5%	17	2.8%	+1.3 pp
8	Cash advance / loans / credit-to-cash	9	2.0%	15	2.5%	+0.5 pp
9	Other product / availability / referrals	11	2.4%	13	2.2%	-0.2 pp
10	Revolving / minimum due / partial-balance flexibility	11	2.4%	11	1.8%	-0.6 pp
11	Repayment channels / due date / payment UX	6	1.3%	10	1.7%	+0.4 pp

Residual themes around flexible payments

Users do not use the industry term, "revolving" but point to it in how they describe their expectations for settling their card balance:

"I should still be able to use my card even if I've only partially paid my balance"

*"Installment options on the *entire bill* with minimal interest"*

"not requiring to pay the bill in full every month"

Promoters: top themes = general product love

76.78% of Q1 survey respondents = Promoters (NPS 9+)

	Reason for score	Q1 Mentions	Q1 %	Delta vs Q4
1	Ease / convenience / simplicity	338	46.7%	-2.2 pp
2	Overall product love / reliability	222	30.7%	+2.9 pp
3	App UX / real-time tracking / features	163	22.5%	+2.9 pp
4	No fees / FX advantage	139	19.2%	-0.6 pp
5	Virtual cards / controls / security	86	11.9%	-2.2 pp
6	Installments / payment flexibility	67	9.3%	+2.6 pp
7	Acceptance / usability everywhere	41	5.7%	+2.5 pp
7	Credit limit / credit access / emergency utility	41	5.7%	+0.6 pp
9	Travel / abroad use case	34	4.7%	+0.6 pp
10	Fast approval / onboarding / activation	32	4.4%	+1.9 pp
11	Rewards / perks / promos	24	3.3%	+1.2 pp
12	Customer support / service	13	1.8%	-0.7 pp

Promoters increasingly describe Zed with **emotional language**: not just “useful” or “convenient,” but “love,” “amazing,” “best,” “premium,” and “no complaints.”

“Love Zed Overall”

“I love the features and more to come.”

“I loved the card itself and the friendly app.”

“Zed is so much very helpful in times of urgent expenses love zed so much”

“Zed is good very good. I couldn’t ask for more.”

“Everything works well. Keep up the good work, and thank you for the great service.”

“Excellent product, the best customer support team”

“Best service and easy transaction”

“Zed is one best credit card today...”

“Zed is great for travelers”

“Amazing app”

“Love everything about zed”

“Zed lives up to its promises; no false advertisements. Probably has the snappiest and awesome app across all local banking platforms.”

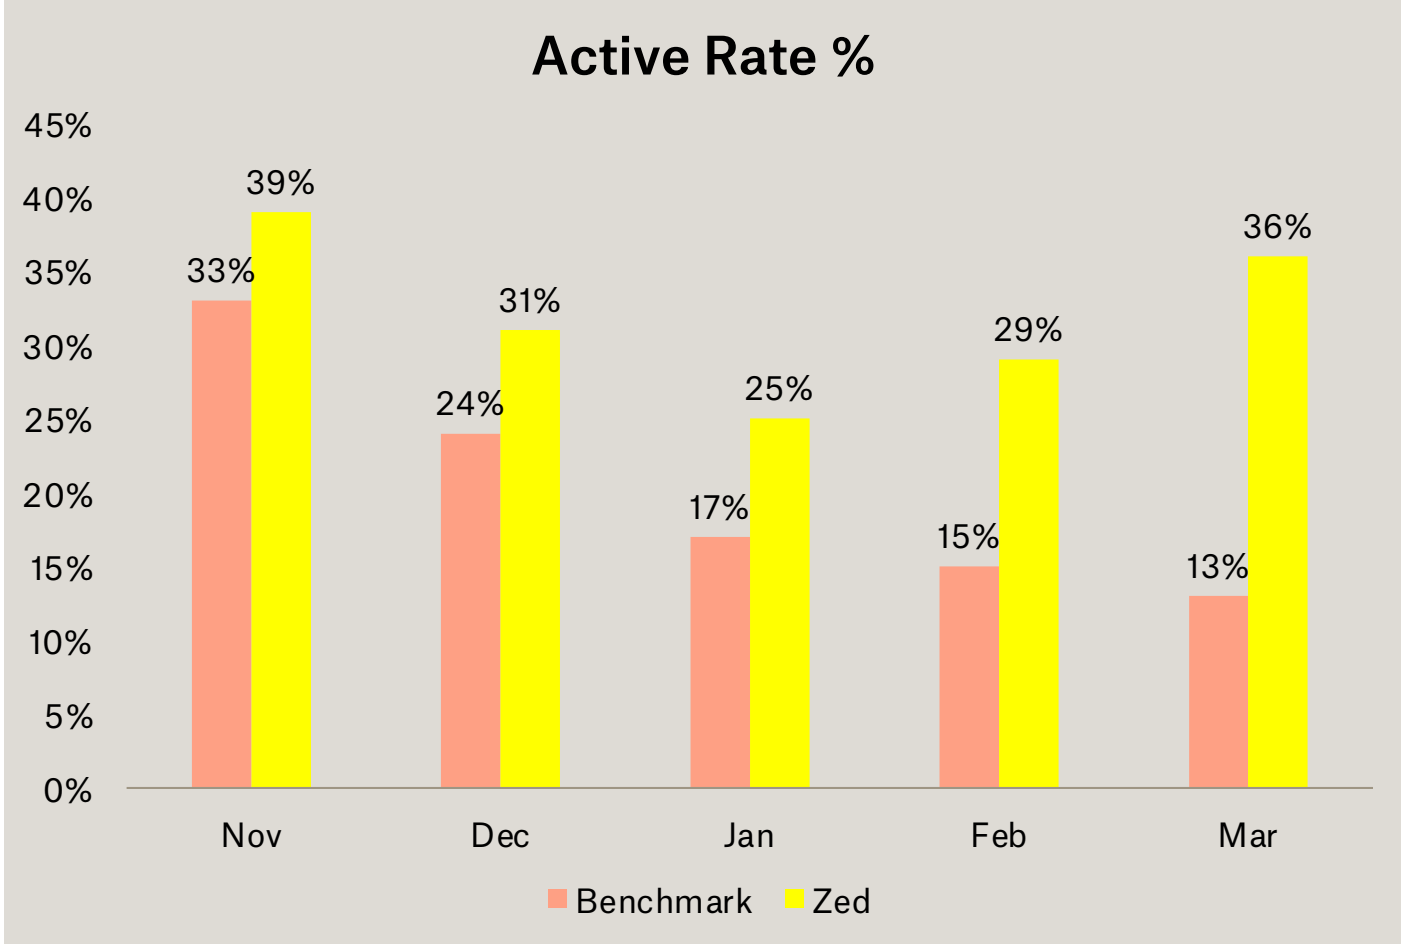

“Really love Zed experience overall. from app UI experience down to features like Virtual cards options and Google wallet integration. Everything is minimalistic yet functional. no complaints.”

“Very reliable and all the features feels premium.”

“Reliable. Almost as if like an ‘actual bank’ card.”

Q2 Plans

Q2 Product Plan

Type	Product / Feature	Benefit
New	Revolving	Driven by user demand, new revenue
	Credit Line Re-optimization (Post Revolving)	Increase spend per cardholder
	Bill Pay Integration	Increase spend per cardholder
	Show spend per card	Multiple support tickets requesting this feature
	WhatsApp notification channel	Improve deliverability
Improvements	Google (Push Provision from App + Wearables)	Increase spend per cardholder
	Bank Statement Extraction - GoTyme	Reach more users
	Bank Statement Extraction - Maya	Reach more users
	Bank Statement Guides per Bank	Usability, Invite to application conversion
	Installments Enhancements	Usability
Compliance	New AML Txn Monitoring Integration	Regulator requirements, reduce fraud risk

Product themes Q3 and beyond

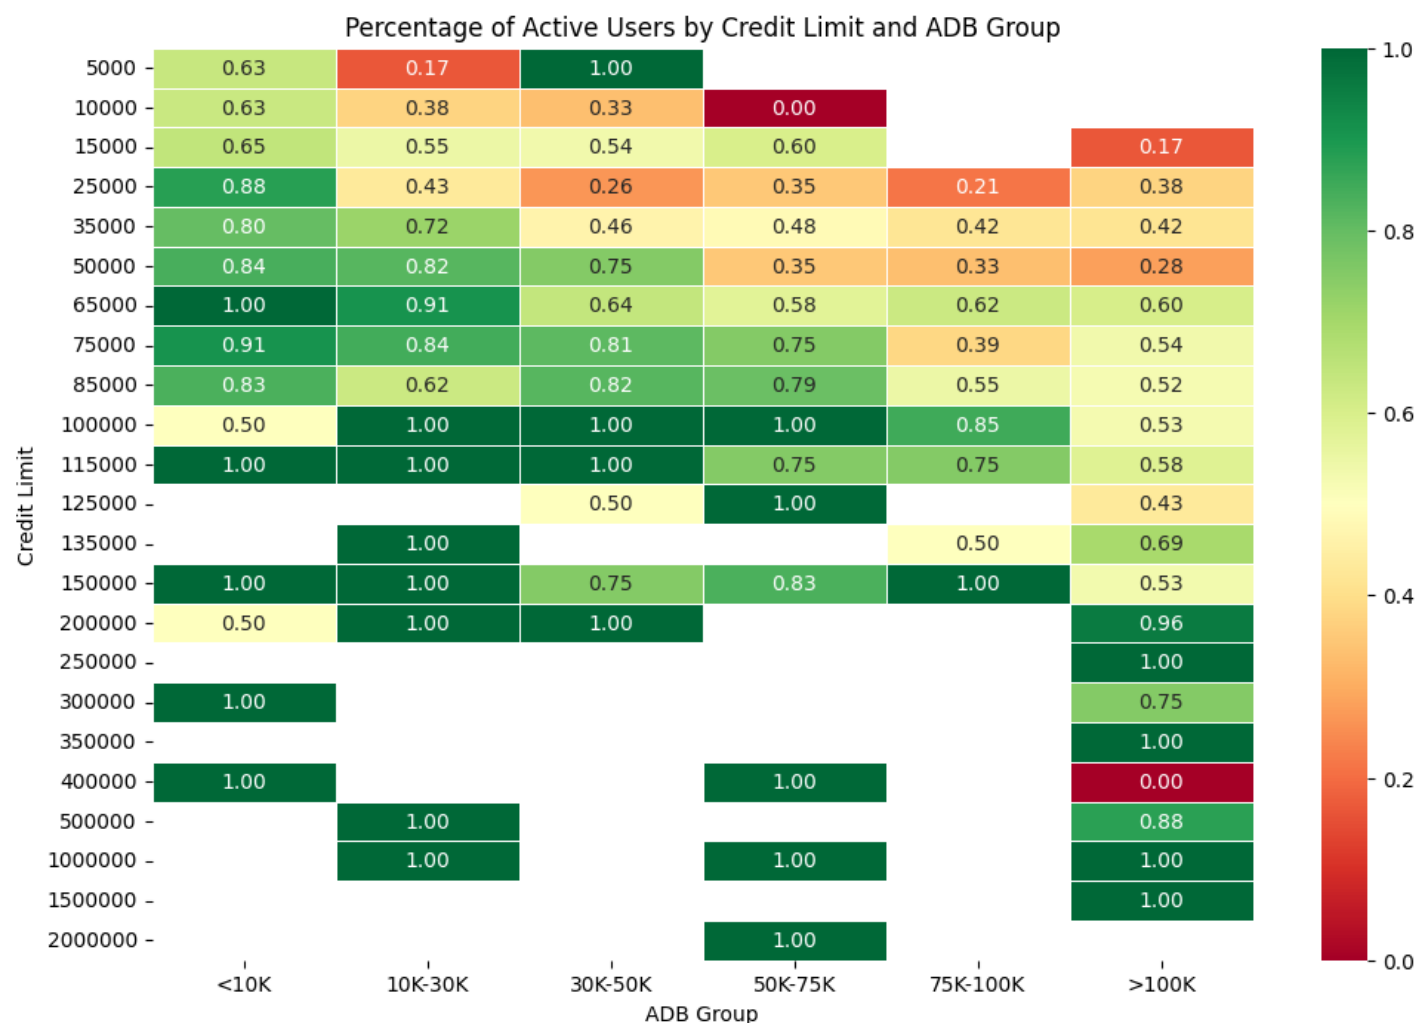

Theme	Rationale
Rewards	• Recurring top request across NPS surveys, user interviews, and online forums • Users want to “get something back” for using the card • Rewards can improve retention, increase wallet share, and make Zed more compelling for everyday spend
Travel Perks	• Travel is highly aspirational for our target demographic • Natural extension of Zed’s existing Zero FX offering • Zed is already seen as a leading travel card because of its 0% FX fees • Mastercard sees clear whitespace to position Zed as a premium travel-focused card
Agentic Concierge	• Reduces effort and friction in high-intent purchasing journeys • Can drive transaction volume • Can be integrated into other themes, such as travel purchasing • Opportunity for Zed to lead the market in agent-driven functionality
Zed Invest	• Zed’s ideal customers have both the assets and appetite to invest • PSE accounts have grown 132% since 2019 to 3M, with retail making up 99% • Filipinos seek global exposure through high cost feeder funds (e.g. BPI US Equity Index, \$260M NAV) • Zed can close the gap with a simple, trusted way to directly buy Local & U.S. stocks

Q2 Targets

1. Cardholders: 10,400
2. NPS: >70%
3. Recruiting
 1. Product Engineer (1)
 2. Data Scientist (1)
 3. PH Ops & Support – New Grads (2)
 4. MBA Intern (1-2)

Appendix

Credit Limit (CL) Re-leveling: ABD Analysis

Activity rates decline rapidly, the lower the cohort's average CL is from their ADB

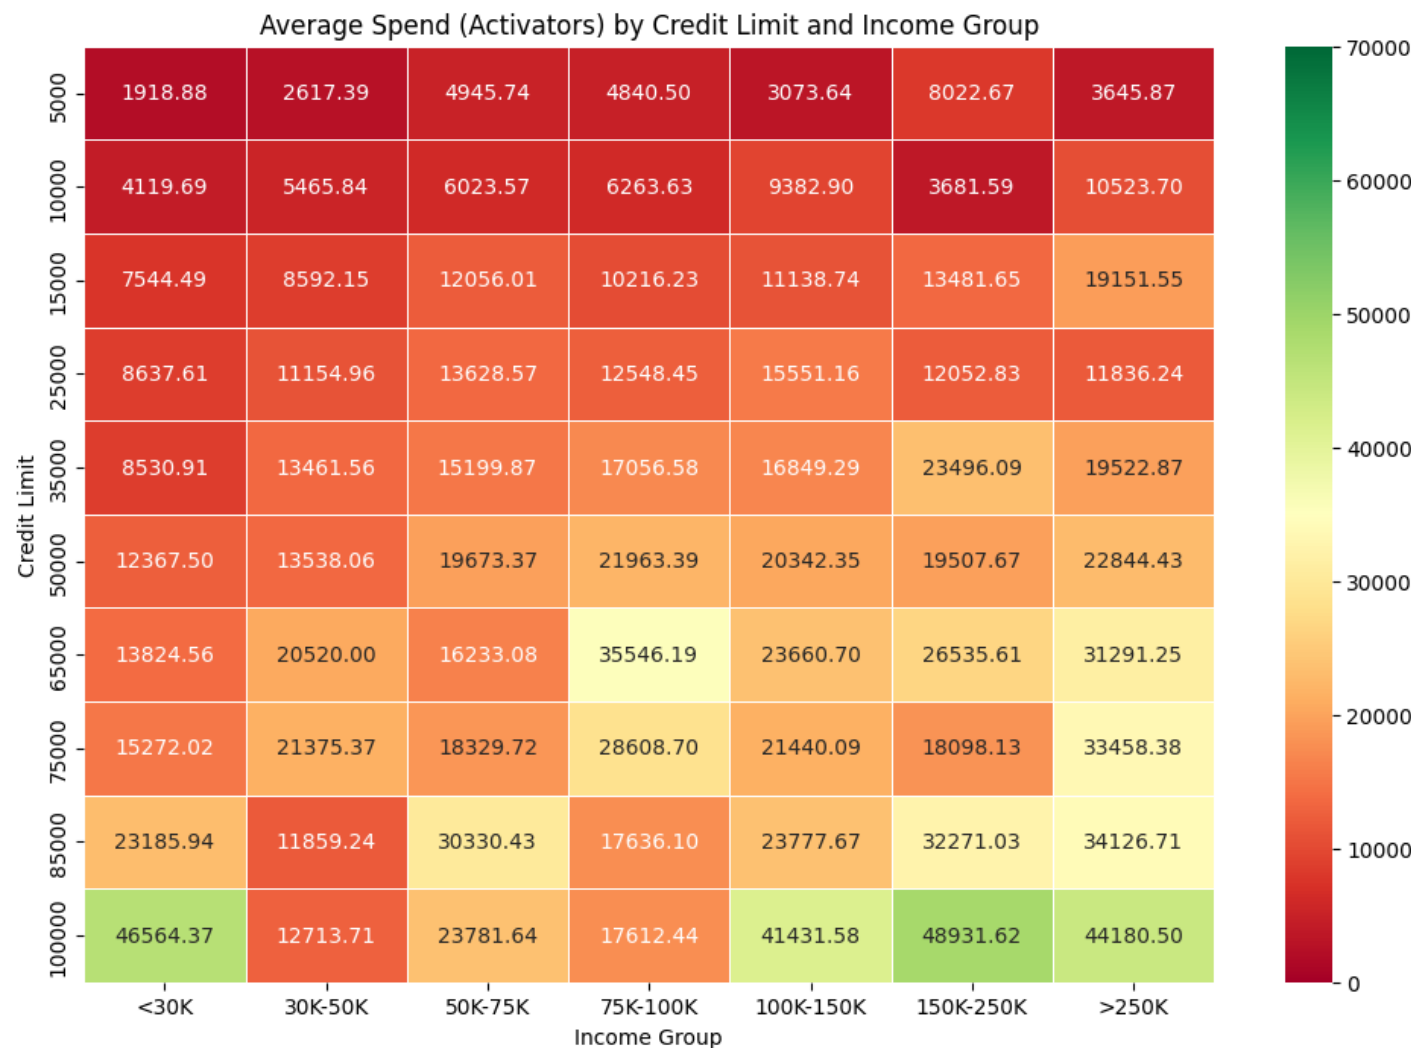

This occurs if self reported income is lower than calculated ADB

Old CL policy was:
 $\min(\text{ADB}, \text{income})$

Users whose CL was greater than ADB consistently exhibit high (often 100%) activity rates (disclaimer: small Ns)

This is the result of earned CL increases

Credit Limit (CL) Re-leveling: Income Analysis

CLs that extend well beyond income levels don't materially drive additional spending

Customer tend to cap their own spend around the level of their monthly income, regardless of credit limits
